

PRODUCT DECLARATION / SAFETY DECLARATION — Asbestshop Type 100 Overall

1. Product Information

- **Product name:** Asbestshop Type 100 Overall
 - **Article number:** 3100X (per piece) / box of 50 pcs
 - **Brand / Supplier:** Asbestshop
 - **Application:** Disposable protective coverall for protection against solid airborne particles during construction, renovation, cleaning, and similar activities. Suitable for use in asbestos-related tasks when combined with appropriate PPE and respiratory protection.
-

2. Product Description

The Asbestshop Type 100 Overall is a single-use protective suit made from a three-layer SMS (spunbond/meltblown/spunbond) polypropylene fabric. It provides reliable protection against solid airborne particles and light liquid splashes during a wide range of industrial, construction and maintenance activities. It may also be used in asbestos-related work when worn together with suitable PPE.

3. Key Features & Properties

- **Material:** 3-layer SMS polypropylene (nonwoven)
 - **Breathability:** Air- and water-vapour permeable for improved comfort
 - **Design features:**
 - Elasticated hood, cuffs, waist and ankles (latex-free)
 - Reinforced crotch
 - Front zipper with protective flap
 - Fixed hood
 - Quadruple-stitched seams
 - **Protective classification:**

Compliant with:

 - **EN ISO 13982-1 (Type 5)** — protection against solid airborne particles
 - **EN 13034 (Type 6)** — limited liquid splash protection
 - **EN 1073-2 (Class 2)** — protection against radioactive particulate contamination (as per standard, not against ionising radiation)
 - **Packaging:** Individually packed or available per carton (e.g. box of 50)
-

4. Usage & Handling Instructions (Summary)

- The overall provides particle protection in various work environments, including construction dust, insulation fibres, cleaning activities and asbestos-related tasks.
 - Always use in combination with appropriate respiratory protection (e.g. FFP3 or P3 mask) and other PPE when exposure to hazardous dust or fibres is possible.
 - Remove the suit carefully after use to avoid releasing particles that may have adhered to the surface.
 - Clothing worn underneath (preferably disposable) should be handled according to the nature of the work performed.
 - **Disposal:**

Dispose of the used suit together with other contaminated materials according to local and national regulations. When used in asbestos-related work, treat as asbestos-contaminated waste.
-

5. Health & Safety Information (Summary)

- The overall **does not contain asbestos** and does not release hazardous fibres.
- Protective performance depends on correct use, including proper donning and doffing.
- Always follow local regulations regarding hazardous materials, workplace safety and waste disposal.
- For asbestos-related work, additional PPE such as respiratory protection, gloves and protective footwear is required.

6. Environmental & Waste Disposal

- Dispose of used protective clothing in accordance with local waste regulations.
- When the suit has been used during asbestos-related tasks, it must be disposed of as asbestos-contaminated waste.
- Do not dispose of contaminated clothing in household waste.

7. Legal / Regulatory Disclaimer

This product is intended as a general protective coverall (Type 5/6).

Users are responsible for assessing workplace hazards, complying with national/local regulations, using appropriate PPE and ensuring correct waste disposal procedures.

For asbestos-related tasks, users must follow all legal requirements applicable in their country.

8. Supplier Declaration

Asbestshop declares that the "Asbestshop Type 100 Overall", when used according to the instructions provided, is suitable as a protective coverall for particle protection in various work environments, including asbestos-related applications when combined with appropriate PPE.

The information in this declaration is based on current product specifications and available knowledge.
